SUBJECT: Lagoon and Contaminated Soil Cleanup, Highland, Oakland County  
245 630375

Dear Mr. Beard:

November 22, 1983 we met at your facility to inspect the lagoon cleanup in progress and discussed further remedial action needed. We further discussed this matter with Willie of Inlandwaters. In summary, the following action has been agreed upon.

1. The large lagoon cleanup will continue as planned until completion.
2. Soil samples will be taken at varying depths in the small lagoon to determine existence and extent of sludge and contaminated soil. All contaminated soil and sludge will be removed and properly disposed of.
3. Contaminated surface soil will be removed from the area west of the large lagoon and north of the small one.

We appreciate your cooperation, to date, in achieving an acceptable cleanup of the contamination sites. If you have any questions, please do not hesitate to call.

Sincerely,  
GROUNDWATER QUALITY DIVISION
